Notice of Bushfire Mitigation Work

Hazard reduction is a key component of bushfire risk management and is critical in reducing the impact of bushfire on communities. The Department of Fire and Emergency Services (DFES) implement Mitigation work to manage fuel loads whilst supporting natural ecosystems. This practice aims to maintain biological diversity in habitats, enhance species richness, and protect life, community assets and natural resources from wildfire damage. Hazard reduction is a key component of bushfire risk management and is critical in reducing the impact of bushfire on communities.

PROPOSED WORKS: Firebreak Maintenance

WHERE: Unmanaged Reserve - Thomas Rd x Bailey Rd Glen Forrest

WHEN: August - December 2026

WHO: Works will be undertaken via DFES authorised contractors

WHAT YOU SHOULD DO IF AFFECTED BY DUST OR NOISE:

- Motorists are advised to slow down, follow signage instructions, and be alert for machinery and workers in the area.
- Residents should keep windows and doors closed to minimise dust and noise intrusion.
- Individuals with health conditions aggravated by dust or noise should follow their prearranged treatment plan and take necessary precautions.

WHAT YOU SHOULD NOT DO:

- Do not enter the work area until it is deemed safe and all signage/hazard tape is removed.
